ABOUT US

Prime Ston is a professional and trusted name in natural stone innovation and manufacturing. With years of expertise, we specialize in creating high-quality laterite stone cladding tiles and eco-friendly stone products that bring timeless beauty into modern architecture.

The Essence of Laterite

Laterite is a unique natural stone, rich in iron, aluminum, and other minerals, naturally formed in tropical regions through centuries of weathering. This process enhances its strength, durability, and natural cooling properties.

For centuries, laterite has been celebrated in the construction of temples, palaces, and spiritual spaces across the world. Known for its purity, vastu benefits, and cooling effect, laterite creates spaces filled with positive energy, elegance, and enduring style.

At Prime Ston, we combine this ancient wonder of nature with modern technology, offering products that are sustainable, versatile, and built to last.
